

bug id	Bug title	bug description	Steps to reproduce
bug_001	No Error Shown for Invalid Email	When wrong email is entered, no error message is displayed.	<ol style="list-style-type: none"> 1. Go to Login Page 2. Enter wrong email 3. Click Login 4. Observe no error message
bug_002	Missing Loading Indicators When Generating Custom Reports	When a user clicks to generate a custom report, there is no visual feedback . This can lead to uncertainty about whether the action has been registered.	<ol style="list-style-type: none"> 1. Login 2. Navigate to the Custom Reports section 3. Set filters or configuration and click Generate Report 4. Observe the absence of any loader/spinner during the process
bug_003	Inconsistent Date Formatting	Dates appear in MM/DD/YYYY format in some places and DD/MM/YYYY in others	<ol style="list-style-type: none"> 1. Login 2. Open filters (e.g., Date Range Picker) 3. Check the format shown in date pickers 4. Go to a campaign card or custom report and check the displayed date
bug_004	Custom Reports Save button disabled even with all fields filled.	Save button remains disabled even with all fields filled.	<ol style="list-style-type: none"> 1. Go to Custom Reports 2. Fill all required fields 3. Try clicking Save

severity	priority	Expected Result	Actual Result
Medium	High	User should see "Invalid credentials" error message	No message shown; user stays on same page
Low	Medium	A loading indicator (spinner, progress bar, or disabled button) should appear while the report is being generated to inform the user that processing is underway	No loader or visual feedback is shown; the button remains active, which may cause user to click repeatedly
Low	Medium	Dates should follow a consistent format across the platform, ideally based on user locale or app setting (e.g., all in DD/MM/YYYY or MM/DD/YYYY)	Some components show MM/DD/YYYY, others show DD/MM/YYYY, without consistency or clarification
High	High	Button should become clickable once form is valid	Button remains disabled

status

Add meaningful login
validation messages

Add a loader animation

Normalize date formats
across all modules

Revalidate form and
enable Save dynamically

TC_ID	Test description	Steps	test data
TC_01	Verify login with valid credentials	<ol style="list-style-type: none"> 1. Open Chrome browser 2. Go to https://app.segwise.ai/login 3. Enter valid email 4. Enter password 5. Click login 	Email: qa@segwise.ai Password: segwise_test
TC_02	Verify login with invalid password	<ol style="list-style-type: none"> 1. Navigate to login page 2. Enter valid email 3. Enter invalid password 4. Click login 	Email: qa@segwise.ai Password: wrong_pass
TC_03	Verify UI responsiveness of login page	<ol style="list-style-type: none"> 1. Open login page 2. Resize browser window (mobile, tablet, desktop) 	—
TC_04	Verify Cost Per Install chart is visible after login	<ol style="list-style-type: none"> 1. Login with valid credentials 2. Navigate to dashboard 3. Scroll to 'Cost per Install' chart section 	—
TC_05	Verify filter functionality on dashboard	<ol style="list-style-type: none"> 1. Login to dashboard 2. Open Filters section 3. Apply filters (e.g., Platform: Snapchat, Date: Last 30 days) 4. Observe changes 	Platform: Snapchat Date: Last 30 days
TC_06	Data consistency test between chart and table	<ol style="list-style-type: none"> 1. Login to dashboard 2. Apply filter (e.g., Campaign A) 3. Compare values between chart and data table 	Platform: Snapchat Campaign: Campaign A

Exp result	actual result	status
Should redirect to dashboard or onboarding page	User successfully logged in and redirected	Pass
Error message should be shown	Login failed with error message	Pass
Login page should remain responsive and elements adjust to screen size	Login page is responsive on all screen sizes	Pass
'Cost per Install' chart should be visible on dashboard	Cost per Install chart is rendered and visible	Pass
Charts and data should reflect applied filters	Data updated correctly as per filters	Pass
Data values should match in chart and corresponding data table	Data matches between chart and table	Pass

Checklist ID	Feature	Component
RC_01	Filters & Boards	Filter Dropdown
RC_02	Filters & Boards	Filter Application
RC_03	Filters & Boards	Board Switching
RC_04	Custom Reports	Report Generation
RC_05	Custom Reports	Report Export
RC_06	Dashboard Charts	Chart Visibility
RC_07	Data Consistency	Metric Comparison
RC_08	UI Consistency	Layout & Alignment
RC_09	Navigation	Back/Forward Navigation
RC_10	Session Management	Auto Logout

Test Description	Severity	Priority	Expected Result
Verify filters open and display all expected options	Major	High	All filter options are visible
Verify applying a filter updates the data accordingly	Major	High	Dashboard updates based on selected filter
Verify switching between different boards reflects the correct data	Major	High	Correct data loads for the selected board
Verify custom report generation for selected date range and filters	Critical	High	Report is generated and displays correct metrics
Verify the export/download functionality for reports	Medium	Medium	Report is downloaded in selected format (e.g., CSV)
Verify charts like 'Cost per Install' & 'DIROS' are visible after login	Critical	High	Charts are visible without errors
Verify consistency between chart data and summary tiles	Critical	High	Data in charts matches summary figures
Verify all components are properly aligned across browsers	Minor	Medium	UI appears consistent across Chrome, Edge, Firefox
Verify user can use browser back/forward to navigate pages without session loss	Medium	Medium	User remains logged in and navigates smoothly
Verify that the session times out after inactivity	Low	Low	User is logged out automatically after idle period

Actual Result	Observed Behavior	Status
All expected filters displayed	All expected filters displayed	Pass
Data updated as per filter	Data updated correctly	Pass
Board switched and data updated	Board switched and data loaded	Pass
Report generated with accurate data	Report generated correctly	Pass
Report exported as CSV	Report exported successfully	Pass
Charts visible after login	Charts displayed correctly	Pass
Chart data matches summary metrics	Metrics matched	Pass
Layout consistent across browsers	UI aligned well	Pass
Session retained on navigation	Session retained	Pass
User auto-logged out after idle	Logout worked	Pass
